

## Personal Development for Civil Engineers

Hello and Welcome.

Watch this video for complete information:

Do you realize that we either grow or disintegrate through the course of life? There is no in-between.

We cannot keep on living the same way forever, in the current state, be it with money, health or relationships. We are either growing or disintegrating. That is the ultimate truth.

The world is changing at such a tremendous rate that we don't even realize how much we have changed in the last 5 years. Where we have come! What and how we have been doing things! What we have achieved! We don't get time to ask these questions to ourselves.

When we finally manage to spare some time and give it a thought, and analyse ourselves in comparison to our past, we discover how much we have improved or degenerated.

Thinking is the first step towards our overall development. And our thinking starts with our needs and desires. Unless we have a need or desire, we do not think about working towards ourselves. But what if we become conscious of our thoughts and actions? Can we achieve something that is beyond our reach? The answer is a resounding yes. Absolutely!

Nothing can be attained in life without really thinking about it. Thinking is the representation of our mind. Our thoughts originate from our mind. And all our actions and behaviours are controlled by our mind. So, thinking is the first step towards our goals and achievements.

I request you to kindly write down the answers to these questions in a piece of paper and give them a thought. The results you have got till now, are they enough or could you have done a lot better?

Also think about how your life would look like in future. Think, think, and then think again. Thinking will give you the energy and help in imagining a life that you thought was out of your reach. But believe me, everything is possible if you strive for it.

We all are created equals. The only difference lies in the way we think and the way we become aware of inner self. For that, I will show you some ways that can help you achieve anything you aspire for.

For the students, are there any limitations on the results you are getting in your academic life? Do you want to see yourself on the top? Answer the list of the upcoming questions and the moment you do it, you will feel a different energy within you and you will be ready to move on to a new stage of your life.

**Successful people do not do certain things, they do things in a certain way.**

What is that certain way? Let's learn about those small but powerful actions that will take you to the next level which you had never imagined before.
